Art Unit: 3644

## **DETAILED ACTION**

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-14, drawn to method of purchasing advertisement, classified in class 705, subclass 14.
  - II. Claims 15-20, drawn to solar powered spacecraft, classified in class 244, subclass172.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are an advertisement method and a spacecraft structure.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/811539

Art Unit: 3644

5. Newly submitted claims 1-14 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons stated above.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 1-14 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

## Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

7. Claims 15-20 are rejected under 35 U.S.C. § 103(a) as being unpatentable over NASA

Space Shuttle Progam in view of Forward or Piening. The NASA Space Shuttle Progam

has launched numerous spacecraft into orbit with "advertisements" on them NASA, TRW, Delta,

Application/Control Number: 09/811539

Art Unit: 3644

Boeing, etc. The NASA Space Shuttle Progam has video cameras to view the sattelites when launched and various crafts of all sizes and shapes and with solar panels and the space station will eventally be of 100's of meters long. Also all of these companies sell products under their name. The two enclosed brosures show the shuttle used to launch various satellites with logos on them that advertise the company that made them that are in the business to make money from space, even NASA charges customers.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to launch the satellites of Forward or Piening in the NASA Space Shuttle Progam as it is another payload.

8. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
